

Dark Skies Herefordshire Light Pollution Survey for Communities

Dark Skies Herefordshire aims to conserve and enhance dark skies across the rural landscape of Herefordshire, raise people’s awareness of Artificial Light At Night (ALAN) and the need for Responsible Outdoor Lighting At Night (ROLAN). It is a volunteer-led initiative that is supported by Herefordshire CPRE (HCPRE).

This survey is to determine whether there is an interest on light pollution and in being part of the Dark Skies Herefordshire project.

Include your POSTCODE HERE:

Question	Answer: Y = Yes, N= No, M=Maybe, NB = Not Bothered Please write comments next to your answer
Are you concerned about light pollution in your community?	
Do you think light pollution affects humans?	
Do you think light pollution impacts wildlife?	
Have you taken any steps to reduce light pollution in your property, business or community building?	
Do you think there is enough awareness about light pollution in your community?	
Would you like to attend a public event or campaign on light pollution and the importance of dark skies?	
Would you like information that can be put into your Parish newsletter or local newspaper on light pollution or the importance of dark skies?	
Any other comments?	

Thank you for your time completing the survey. If you would like more information about the project, please contact volunteer@cpreherefordshire.org.uk.
